Volume 122 · Numbers 1 to 3 · 1995

RESEARCH ARTICLES

Li WKW
Composition of ultraphytoplankton in the central North Atlantic 1–8

Mordy CW, Penny DM, Sullivan CW
Spatial distribution of bacterioplankton biomass and production in the marginal ice-edge zone of the Weddell-Scotia Sea during austral winter 9–19

Cho BC, Azam F
Urea decomposition by bacteria in the Southern California Bight and its implications for the mesopelagic nitrogen cycle 21–26

Glibert PM, Conley DJ, Fisher TR, Harding LW Jr, Malone TC
Dynamics of the 1990 winter/spring bloom in Chesapeake Bay 27–43

Heiskanen AS
Contamination of sediment trap fluxes by vertically migrating phototrophic micro-organisms in the coastal Baltic Sea 45–58

Richards SA, Possingham HP, Noye BJ
Larval dispersion along a straight coast with tidal currents: complex distribution patterns from a simple model 59–71

Laprise R, Pepin P
Factors influencing the spatio-temporal occurrence of fish eggs and larvae in a northern, physically dynamic coastal environment 73–92

van Rooij JM, Bruggemann JH, Videler JJ, Breeman AM
Plastic growth of the herbivorous reef fish *Sparisoma viride*: field evidence for a trade-off between growth and reproduction 93–105

Gaudian G, Medley PAH, Ormond RFG
Estimation of the size of a coral reef fish population 107–113

Campana SE, Gagné JA, McLaren JW
Elemental fingerprinting of fish otoliths using ID-ICPMS 115–120

Bailey TG, Youngbluth MJ, Owen GP
Chemical composition and metabolic rates of gelatinous zooplankton from midwater and benthic boundary layer environments off Cape Hatteras, North Carolina, USA 121–134

Kiørboe T, Saiz E
Planktivorous feeding in calm and turbulent environments, with emphasis on copepods 135–145

Saiz E, Kiørboe T
Predatory and suspension feeding of the copepod *Acartia tonsa* in turbulent environments 147–158

Owens L, Rothlisberg PC
Epidemiology of cryptonisci (Bopyridae: Isopoda) in the Gulf of Carpentaria, Australia 159–164

Aagaard A, Warman CG, Depledge MH
Tidal and seasonal changes in the temporal and spatial distribution of foraging *Carcinus maenas* in the weakly tidal littoral zone of Kerteminde Fjord, Denmark 165–172

Hole LM, Moore MN, Bellamy D
Age-related cellular and physiological reactions to hypoxia and hyperthermia in marine mussels 173–178

Lozano J, Galera J, López S, Turon S, Palacín C, Morera G
Biological cycles and recruitment of *Paracentrotus lividus* (Echinodermata: Echinoidea) in two contrasting habitats 179–191

Turon X, Giribet G, López S, Palacín C
Growth and population structure of *Paracentrotus lividus* (Echinodermata: Echinoidea) in two contrasting habitats 193–204

Völkel S, Hauschild K, Grieshaber MK
Sulfide stress and tolerance in the lugworm *Arenicola marina* during low tide 205–215

Miller MW
Growth of a temperate coral: effects of temperature, light, depth, and heterotrophy 217–225

MacIntyre HL, Cullen JJ
Fine-scale vertical resolution of chlorophyll and photosynthetic parameters in shallow-water benthos 227–237

McGlathery KJ
Nutrient and grazing influences on a subtropical seagrass community 239–252

Vergara JJ, Bird KT, Niell FX
Nitrogen assimilation following NH_4^+ pulses in the red alga *Gracilariopsis lemaneiformis*: effect on C metabolism 253–263

Conley DJ, Johnstone RW
Biogeochemistry of N, P and Si in Baltic Sea sediments: response to a simulated deposition of a spring diatom bloom 265–276

Olsgard F, Gray JS
A comprehensive analysis of the effects of offshore oil and gas exploration and production on the benthic communities of the Norwegian continental shelf 277–306

NOTE

George SG, Christiansen JS, Killie B, Wright J
Dietary crude oil exposure during sexual maturation induces hepatic mixed function oxygenase (CYP1A) activity at very low environmental temperatures in Polar cod *Boreogadus saida* 307–312

MARINE ECOLOGY PROGRESS SERIES

HISTORY: Marine Ecology Progress Series (MEPS) was established in response to requests from numerous marine ecologists from all over the world. When founded, MEPS was based on 'Marine Ecology' – the first comprehensive, integrated treatise on life in oceans and coastal waters – conceived, organized and edited by Professor Otto Kinne, and published by John Wiley & Sons.

AIM: MEPS serves as a world-wide forum for all aspects of marine ecology, fundamental and applied. The journal covers: microbiology, botany, zoology, ecosystem research, biological oceanography, ecological aspects of fisheries and aquaculture, pollution, environmental protection, conservation, resource management.
Ecological research has become of paramount importance for man's future. The information presented here should, therefore, encourage critical application of ecological knowledge for the benefit of mankind and, in fact, of life on earth. Marine Ecology Progress Series has received recognition as the leader in its field. The journal strives for

- complete coverage of the field of marine ecology
- the highest possible quality of scientific contributions
- quick publication
- a high technical standard of presentation.

SCOPE: MEPS is international and interdisciplinary. It presents rigorously refereed and carefully selected research articles, reviews and notes, as well as comments, concerned with:

Environmental Factors: Tolerances and responses of marine organisms (microorganisms, autotrophic plants, and animals) to variations in abiotic and biotic components of their environment; radioecology.

Physiological Mechanisms: Synthesis and transversion of organic material (mechanisms of auto- and heterotrophy); thermo-, ion-, osmo- and volume-regulation; stress resistance; non-genetic and genetic adaptation; population genetics; orientation in space and time; migrations; behavior; molecular basis of ecological processes.

Cultivation: Maintenance and rearing of, as well as experimentation with, marine organisms under environmental and nutritional conditions which are, to a considerable degree, controlled; analysis of the physiological and ecological potential of individuals, populations and species; determination of nutritional requirements; ecological aspects of aquaculture; water-quality management; culture technology.

Dynamics: Production, transformation, and decomposition of organic matter; flow patterns of energy and matter as these pass through organisms, populations and ecosystems; biodiversity; variability of ecosystem components; trophic interrelations; population dynamics; plankton ecology; benthos ecology; estuarine and coastal ecology; wadden-sea ecology; coral reef ecology; deep-sea ecology; open-ocean ecology; polar ecology; theoretical ecology; ecological methodology; ecological modelling and computer simulation.

Ocean Management: Human-caused impacts: their role as modifiers and deformers of living systems, their biological consequences and their management and control; inventory of living resources in coastal areas, estuaries and open oceans; ecological aspects of fisheries; pollution of marine areas and organisms; protection of life in the seas; management of populations, species and ecosystems; management of coastal zones and sea areas; biotechnology.

Scientific publications appearing in this journal have been rigorously refereed, carefully quality-improved, and professionally selected by our editorial staff. These publications, and all parts thereof, are protected by copyright. This covers the exclusive rights of the publisher to *reproduce* (by any means, including photographic or electronic), to *distribute* (including via photocopies, reprints, or electronic means), and to *store* on microfilm, in electronic data bases, on video disks, etc., this material. The acceptance regulations of a manuscript for publication automatically include the consent of the author(s) to transfer the copyright to the publisher. Permission for exceptions to these rules must be obtained in writing from the publisher at the time of manuscript submission.
In the USA, photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee (US $3.00 per article) is paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA.

Publisher, editors and authors do not accept legal responsibility for errors, omissions or claims, nor do they provide any warranty, express or implied, with respect to information published in MEPS.

Tables of contents and *tables of contents with abstracts* for MEPS are available free of charge on the Internet via World Wide Web (http://www.int-res.com/int-res).
